

New 5ense

Improved Sensing and Positioning via 5G and mmWave radar for Airport Surveillance

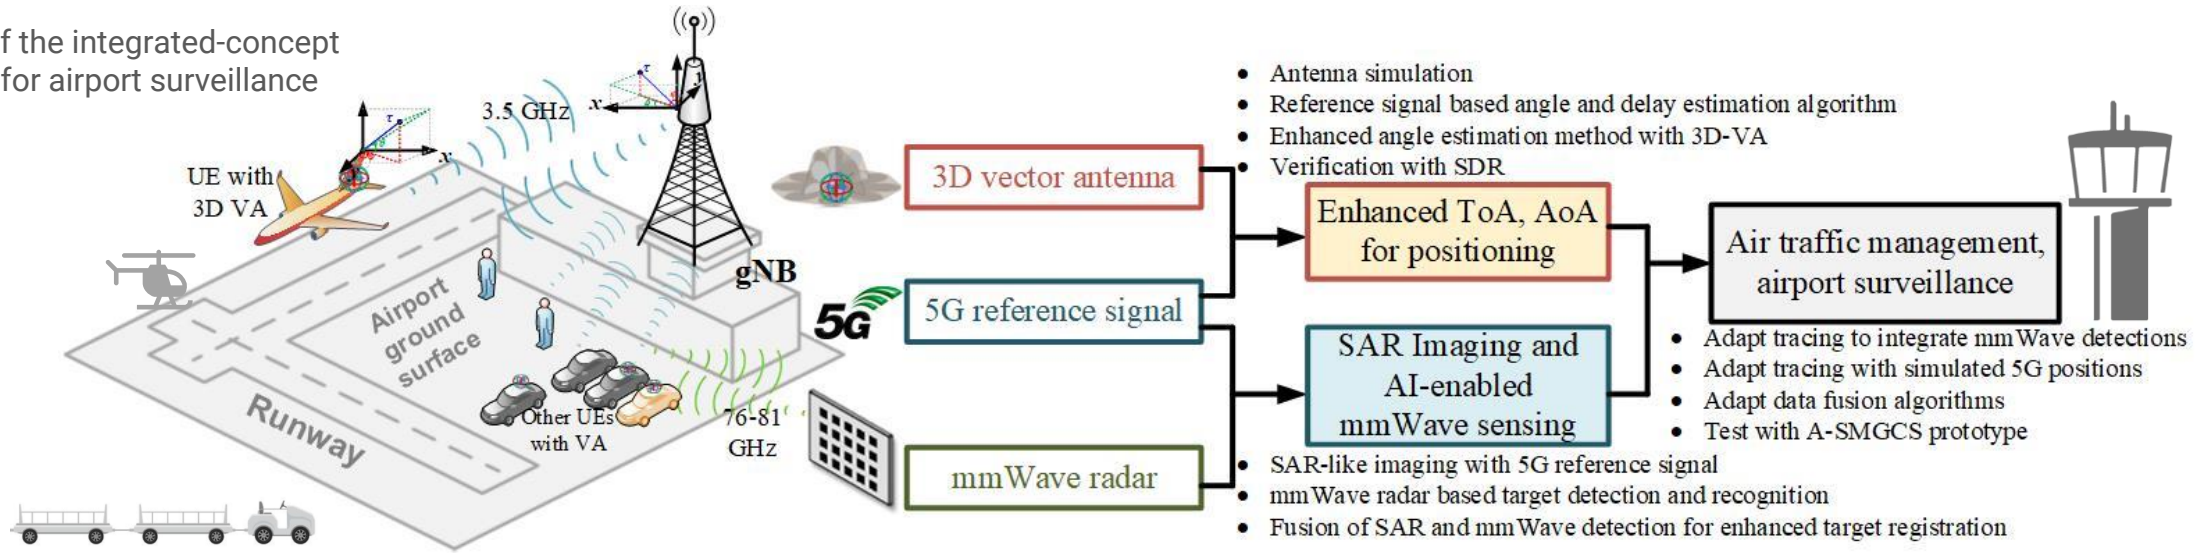

AOA Angle Of Arrival
 CSI Channel Status Information
 LOS Line Of Sight
 PRS Positioning Reference Signal
 SDR Software Defined Radio
 SRS Sounding Reference Signa
 TOA Timer Of Arrival

New 5ense

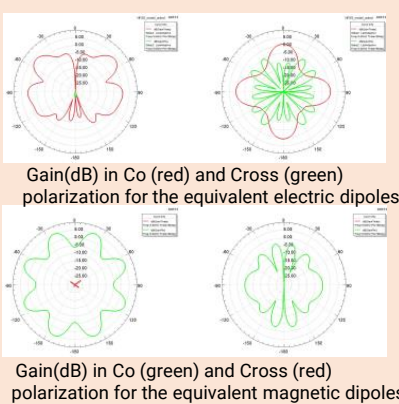

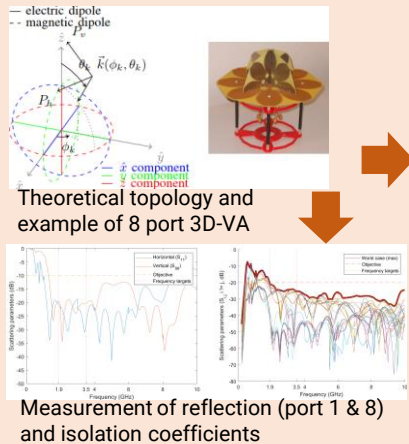

Improved Sensing and Positioning via 5G and mmWave radar for Airport Surveillance

Illustration of the integrated-concept architecture for airport surveillance

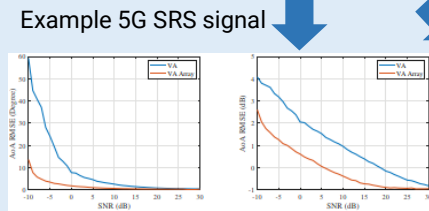

3D Vector Antenna

- Wide angular coverage in 3-D
- Compact size, wideband coverage
- Good polarization discrimination

5G Reference Signal

- Uplink SRS; downlink PRS, CSI-RS
- Direct transmission → Subspace-based, EM-base angle-time estimation
- Echoes → imaging

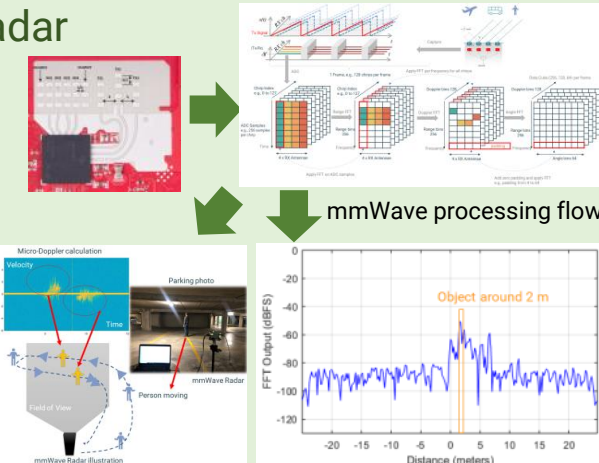

SRS based AoA estimation with 3D VA array

SRS based SAR simulation

mmWave Radar

- Range, velocity, angle detection
- Targets characterization
- Targets classification using AI

Range-Doppler information

mmWave range detection
